The main aim of the designs was to work with the materials and to create a quality product to meet the requirements of a contemporary interior. The interiors are not limited to one room, but rather to a whole lifestyle. The Wreath consists of an elegant collection of dinnerware and contemporary glassware. The setting is added with statement lighting fixtures, and the furniture of the Danish design company of Hans Wegner. Both the forms and the design of the product is inspired by Karl Teunissen's world. His collection can be described as sophisticated and modern, unique, and stylish. The combination of the materials used is an important part of it, and it feels like old and new together. The Wreath is primarily available as a collection of dinnerware. It contains six different bowls, a cafetière, teapot, hot drink set and sauce set. "The Wreath" is a perfect collection for every day, as well as special occasions.
